Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 June 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Claims 33-96 have been canceled.
Claims 113, 135, 140 were amended.
2. Claims 113-121, 123-165 are under examination.
3. The text of those sections of Title 35 U.S.C. code not included in this office action can be found in a prior Office Action

Drawings

4. The proposed drawing correction filed on 6/4/03 has been disapproved because it is not in the form of a pen-and-ink sketch showing changes in red ink or with the changes otherwise highlighted. See MPEP § 608.02(v).

Sequence Requirements

5. This application is still not in sequence compliance because amended figure 1 was not added to the specification because it did not contain a red marked up copy of the amended Figure 1. Supplying a marked up copy of Figure 1 would obviate the sequence requirements because Figure 1 would be the same as SEQ ID NO:5.

Rejections Withdrawn

6. The rejection of claims 113-121, 123-144, under 35 U.S.C. 112, first paragraph, because the specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims is withdrawn in view of the amendments to the claims.

Response to Arguments

7. The rejection of claims 113-121, 123-165 under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention is maintained.

The response filed 6/4/03 has been carefully considered but is deemed not to be persuasive. The response states that the attached printout from an E-mail from Dr. Chowdhury overcomes the rejection. In response to this argument, the E-mail is acknowledged but is not in declaration form. The incorporation of essential material in the specification by reference to a GenBank is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579,

179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

8. The rejection of claim 120 under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention is maintained.

The response filed 6/4/03 has been carefully considered but is deemed not to be persuasive. The response states that the incorporation of the dsFv fragments of the '252 application is limited to a generic statement and does not refer only to dsFv fragments in general but to the entire application and the entirety of the specification of the '252 application including the designation of particular residues that can be mutated to cysteines has always legally been part of the specification. In response to this argument, the part of the specification that references the '252 application is headed "antibodies" and is directed to examples of immunoglobulins and to genetically engineered forms and includes dsFv fragments. The passage does not incorporate the residues that would be altered to form the dsFv. There is nothing in the passage that limits one to only altering the recited residues in claim 120 to cysteines.

Applicant is required to provide specific support for the claimed limitation in the specification as originally filed or remove it from the claim.

Conclusion

9. No claims are allowed.

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
